

Targeting to Improve Outcomes in Advanced Neuroendocrine Tumors, Gastric Cancer and Hepatocellular Carcinoma: Clinical Impact of mTOR Therapy

Friday, August 27, 2010 | 12.40 – 14.10
Hong Kong SAR, People's Republic of China

FACULTY

Eric Van Cutsem, MD, PhD – Chair
University Hospital Gasthuisberg
Leuven, Belgium

Atsushi Ohtsu, MD
National Cancer Center
Hospital East
Kashiwa, Japan

Li Tzong Chen, MD, PhD
National Health Research Institute
Taipei, Taiwan

Young Suk Park, MD, PhD
Samsung Medical Center
Seoul, Korea

AGENDA

Time	Title	Faculty
12.40 -12.45	Welcome, Overview and Objectives	Eric Van Cutsem, MD, PhD
12.45 -13.05	mTOR as an Emerging Therapy in the Treatment of Advanced Neuroendocrine Tumors	Young Suk Park, MD, PhD
13.05 -13.25	Investigating the mTOR Pathway in the Treatment of Gastric Cancer	Atsushi Ohtsu, MD
13.25 -13.45	An Examination of mTOR as A Potential Target in the Treatment of Hepatocellular Carcinoma	Li Tzong Chen, MD
13.45 -14.05	Discussion	All
14.05 -14.10	Closing Remarks and Conclusions	Eric Van Cutsem, MD, PhD

An independent satellite symposium held in conjunction with 4th World Congress on Gastrointestinal Cancer: Asian Perspectives. This presentation is not sponsored or endorsed by 4th World Congress on Gastrointestinal Cancer: Asian Perspectives
